

TRUPTI GIRIDHAR BIDAWE

Junior Software Engineer

-  bidavetrupti.g@gmail.com
-  9403822234
-  29th May, 1995
-  Nashik Road

SKILLS

- SQL/ T-SQL/ PL-SQL.
- Database Normalizations.
- DML,DDL,and DCL Commands,joins, Sub-query,Stored procedure, Functions, Views,Index,Constraints,Pivot.
- Query Optimizations.
- Database mapping and migrations(SSIS).
- Basic knowledge of Microsoft Azure.

TOOLS

- SQL Server Management Studio.
- Microsoft Visual Studio (SSIS).
- Red gate SQL data compare tool.
- Microsoft Azure.

EDUCATION

- C-DAC (PG Diploma on Advance Computing)-2018
CGPA- 64.10%
IACSD, Akurdi, Pune.
- Bachelor of Engineering (E&TC)- 2016
CGPA- 67.02
University of Pune, Nashik.
- Diploma (E & TC)- 2013
CGPA- 80.11
Maharashtra State Board, Nashik.
- Matriculation-2010
CGPA- 84.55
Maharashtra State Board, Nashik.

PROFESSIONAL SUMMERY

2 Years of experience in Design and Development of IT Solutions with focus on Software Applications Projects. Sound technical knowledge in the field of Development, along with the ability to quickly adapt to new technologies.Hands on in Requirement analysis,Problem solving.Experience in handling multiple modules.Experience in working against strict deadlines and high-pressure situations.

EXPERIENCE

First-Insight software Solutions,Pune, Maharashtra.
November -2018 to November -2020.

Project - Maximeyes eye care EHR and practice management

- MaximEyes.com is a unified ONC-ACB certified EHR and practice management eye care software for patient management and clinical documentation.
- The ophthalmology and optometry EHR software replaces paper charts and rigid systems with: customizable templates, one-screen summaries, deep reporting, powerful query tools, and ophthalmic equipment integrations.
- Create custom alerts about patients for staff and assign where and how you want alerts to appear for patient demographics, scheduling, billing, optical, and EHR.
- Enables staff to quickly find a suitable slot for the patient without flipping through days or weeks in the schedule.
- Quickly transfer diagnostic codes, procedure codes, fees, glasses or CL Rx, and recall data to other parts of the system with a single click.
- Quickly create custom lens packages for one-click selection of common lens combinations. See order status and quotes. Send orders electronically to most optical labs.
- Easily post insurance adjustments and negative chargebacks. Assign line item amounts in Superbill to specific insurance plans or patient.
- Technologies used in project: .net C#, angular JS, HTM,CSS,Java Script.,MYSQL ,Azure.
